

SCUBAPRO

S-TEK SPINNER SPOOLS

With a distinct design reminiscent of the classic G250 second stage, S-Tek Spinner Spools are easy to use, comfortable to carry and offered in 3 different line lengths. The key to the spool's user-friendliness can be found in the exclusive SCUBAPRO-branded spinner discs located at the center point of the spool that allow the discs to remain static while the spool spins and the line plays out.

■ SPINNER DISCS

Remain static while the spool spins, so the spool will not rotate out of your hand like normal spools can.

■ SLOTTED DESIGN

Allows for a secure, comfortable grip while playing out line.

■ DISC BRAKE EFFECT

Easily adjust tension on the line by squeezing the spinner discs together, forming a disc brake effect.

■ SPOOL BODY DESIGN

Makes it easy to clip off to a bolt snap.

■ STAINLESS STEEL BOLT SNAP INCLUDED

■ DURABLE CONSTRUCTION

Injection-molded fiberglass reinforced nylon with stainless steel axle and screws.

■ CUSTOMIZATION AVAILABLE

Color coordinate your S-Tek Spinner Spool to match your other gear in 7 great colors. Color kits fit all sizes of Spinner Spools and are sold separately.
